

2017 International Infection Prevention Week

Across

3. Surfaces and objects in this could be contaminated with microorganisms that can cause disease

5. This is the presence and multiplication of microorganisms without invasion or damage

12. Hands must be cleaned with soap and water when a patient is known to have this infection

13. In healthcare settings, handrubs containing at least 60% of this ingredient may be used to clean hands when they are not visibly soiled

14. The "S" in MRSA stands for this

15. This product must be used with water when hands are visibly soiled

16. This type of PPE should be worn anytime your clothing may become contaminated

17. These Precautions apply to specified patients known or colonized with epidemiologically important microorganisms that can be transmitted by direct or indirect contact

18. These precautions apply to all patients receiving care in hospitals regardless of their diagnosis or presumed infection status

19. A major factor in the emergence of antibiotic resistant organisms is overuse of these

Down

1. Patients with a DRO or a history of a DRO should be placed in a private room or this with another same sex patient with the same organism if a private room is not available

2. Microscopic unicellular organisms that commonly reproduce by cell division (fission) and contained within a cell wall. They are a natural component of the human body, particularly on the skin, mouth and intestinal tract

4. Standard precautions apply to this substance and other body fluids that may contain pathogens that cause infections

6. The passage or transfer of a disease from one individual to another is known as

7. "An ounce of" this "is worth a pound of cure"

8. The act of cleaning the hands for the purpose of removing soil, dirt and/or microorganisms

9. This is the result of a pathogenic organism invading and multiplying in a body part or tissue and causing injury or illness

10. These should be worn when handling patient linen

11. The "V" in VRE stands for this
