

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Period: \_\_\_\_\_

# 20 Genetic Terms

**Across**

7. What has one allele for a specific trait is not completely expressed over its paired allele.

8. What receive one version of a gene

9. It's a trait passed from parent to offspring.

11. It has a different form of gene's.

12. It is a non-Mendelian inheritance pattern that involves more than just the typical two alleles.

13. It has two different alleles for a trait.

14. It has a determination of a particular characteristic.

**Down**

1. what has visible traits?

2. Who's trait always shows up in the organism when the allele is present?

3. What is hidden whenever the \_\_\_\_\_ allele is present?

4. What has organism's that has two identical alleles?

5. What shows all possible ways alleles can combine?

6. what has a genetic makeup?

10. What describes how likely that an event will occur?

15. Two different alleles for a trait.
