

# 3 D objects

**Across**

- 2. Is the corner where 2 shapes meet to make 3 D object
- 7. Is a 3D object with two circles on both ends and two parallel lines
- 8. Is a four-sided shape with equal length and angles
- 12. Is a three sided shape
- 14. Is one that does not have equal sides and angles

15. It has a square base at the bottom

16. Line that runs from left to right across a page

**Down**

- 1. Is one that goes straight up and down
- 3. Is made of four triangular faces
- 4. All angles are equal and the sides have same length

5. Is an object with six faces that are rectangles

6. Is made of six equal squares put together to Form it

9. Is an imaginary line

10. Is a round shaped figure that does not have corners or edges

11. It is the flat surface of a shape

13. It is where two faces meet to make a 3D object
