

5.1 Heredity Key Vocab.

Across

3. Physical characteristics that can be observed

10. Traits determined by genes

11. A specific characteristic of something

12. Different forms of genes

Down

1. Trait that always shows up in organism when allele is present

2. Stays hidden even when alleles are present

4. Has to be the same alleles-2 Dom.-or-2 Rec.

5. Tool used to determine probability of trait showing up in offspring

6. Passing of characteristics from parent to offspring

7. Must be different alleles-1 dom.-and-1 rec.

8. Genes that are not passed down from parent, they are learned

9. Genes that organism has
