

Name: _____

5TH GRADE MATH VOCABULARY

Across

- 3. 4-sided figure with opposite sides equal and all right angles
- 4. 4-sided figure that has opposite sides parallel
- 5. Triangle with all sides equal
- 9. A number that is part of a whole
- 13. The middle of a set of data
- 14. 4-sided figure with all sides and angles equal
- 16. Angle that is 180 degrees
- 18. The number that occurs the most in the data

- 19. 4-sided figure with 1 pair of parallel sides

- 20. diamond with all sides equal
- 22. Angle less than 90 degrees
- 24. Triangle with no sides equal
- 25. The distance around a figure.

Down

- 1. The difference between the smallest and largest number in the data
- 2. The number of cubic units that fills a figure.
- 6. Segment that passes through the center of a circle

- 7. A number that has more than 2 factors.

- 8. Triangle with 2 sides equal
- 10. Device used to measure angles
- 11. Angle that is greater than 90 and less than 180 degrees
- 12. A number that has exactly 2 factors (1 and itself).
- 15. Angle that is 90 degrees
- 17. Segment from the center to a point on the circle
- 21. The average of a set of data.
- 23. The number of square units inside a figure.
