

# 5th grade Biomes vocab

**Across**

- 2.** a relationship in which one organism lives in or on another organism and benefits from that relationship while the other organism may be harmed by it.
- 4.** a cool forest biome of conifers in the upper Northern Hemisphere.
- 11.** one of Earth's large ecosystems, with its own kind of climate, soil, plants and animals.
- 12.** Anything that controls the growth or survival of a population.

- 13.** a biome where grasses, not trees, are the main plant life. Prairies are one kind of grassland region.

**Down**

- 1.** a hot, humid biome near the equator, with much rainfall and a wide variety of life.
- 3.** a relationship between two kinds of organisms that benefits one without harming the other.
- 5.** A characteristic that enables a living thing to survive in its environment.

- 6.** a relationship between two kinds of organisms that lasts over time.
- 7.** a relationship between two kinds of organisms that benefits both.
- 8.** a sandy or rocky biome, with little precipitation and little plant life.
- 9.** Large, treeless plain in the arctic region, where the ground is frozen all year.
- 10.** a forest biome with many kinds of trees that lose their leaves each autumn.
