

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# 9 Largest Phylum

**Across**

- 2. Non backboned animal
- 4. Inner germ layer
- 6. Are animals unicellular or multicellular?
- 8. Belly or lower surface of animal
- 10. forms muscles, circulatory system, reproductive & excretory systems
- 12. organs that filter blood in vertebrates
- 13. A fertilized egg
- 20. animals that produce both sperm and eggs
- 21. An internal body cavity lined with mesoderm
- 22. What phylum are humans in?

- 24. clusters of nerve cells
  - 26. fertilization that occurs inside body of female & larger numbers of eggs are produced
  - 27. What animals form a mouth first?
  - 28. What phylum do insects belong to?
  - 29. Head or front end of animal?
  - 30. Animal with its senses concentrated at its head?
- Down**
- 1. animals with a coelom
  - 3. How do animals reproduce?
  - 5. fertilization that occurs inside body of female & fewer numbers of eggs are produced

- 7. What animal has the simplest skeleton?
- 9. forms skin, nerves, & sense organs
- 11. Gains energy by consuming others
- 14. small, hair like structures used to eat or move
- 15. a toxic waste that must be gotten rid of in an animals body
- 16. What phylum do jellyfish belong to?
- 17. What is the larva of cnidarians?
- 18. What is the larva of mollusks
- 19. interprets nerve impulses & sends a response
- 23. Animal with a backbone
- 25. Central cavity of blastula
