

AP HuG Review

Across

5. average number of kids a woman has during her reproductive years
 8. the inputs for the manufacturing process
 9. production location before the industrial revolution; small scale
 11. shipping boxes which were invented that makes Post-Fordist production possible
 12. when people migrate to a place because of a family/friend connection

Down

1. trade without barriers like tariffs or quotas which results in low prices but also, low wages for workers
 2. economic system which makes a parent country richer than a colony
 3. production which relies on comparative advantage, flexibility, and final assembly near the market
 4. commercial agriculture in LDCs that uses human labor instead of machines

6. interaction declines as distance increases

7. the geographer who created the World Systems Theory

10. production which relies on assembly lines in one location
