

Name: _____

Date: _____

A solid figure with the shape of a round ball

Across

- 4. The answer to a subtraction problem
- 8. The distance around a shape
- 9. Figures that have the same shape but have different sizes
- 11. The answer to an addition problem
- 13. The top number of a fraction
- 15. A flat, round shape
- 16. A polygon with four (4) sides
- 17. A number close to an exact number
- 18. A solid with a circular base that comes to a point on top
- 19. The answer to a multiplication problem

- 20. A figure that begins and ends at the same point
- 22. Figures that have the same shape and size
- 23. A solid with a flat polygon base that comes to a point on top
- 24. Numbers that have 2, 4, 6, 8, or 0 in the ones place

Down

- 1. A quadrilateral with two (2) pairs of parallel sides
- 2. An imaginary line that divides a shape into 2 alike parts
- 3. Numbers that have 1, 3, 5, 7, or 9 in the ones place

- 5. Lines that never cross and stay the same distance apart
- 6. A solid figure shaped like a can
- 7. A solid figure with six (6) faces that are rectangles
- 10. The answer to a division problem
- 12. The product of a given number and another whole number
- 14. A solid figure with six (6) faces that are squares
- 21. A ninety (90) degree angle shaped like a capital L
