

# Abiotic and Biotic Factors

**Across**

- 3. An organisms response to the duration of day and night
- 10. Plant adapted to living in dry water scarce areas
- 11. Referring to soil
- 13. A plants response to the direction of sunlight

**Down**

- 1. Organism that feeds on dead organic matter

- 2. Collection of living and non living factors that interact together
- 4. To do with the position and shape of an area
- 5. Organisms that are active during the day
- 6. Height above sea level
- 7. The seasonal movement of animals from one area to another

- 8. Populations of different species in the same area
- 9. Organism that can not produce its own food
- 12. The direction a slope faces
- 14. Dead and decaying organic matter in soil
