

Adaptation

Across

3. When a predator feeds on just one type of prey, there is this between the populations

5. Animals, like bears, do this over the winter

7. Eye colour is an example of this type of variation

8. Plants compete for these but animals do not

10. Animals compete for these to reproduce

11. Animals compete for this, to hunt and provide shelter

Down

1. Characteristics that enable an organism to be successful and survive

2. Differences in characteristics

4. Variation caused by surroundings

6. Both animals and plants for this

9. Organisms that have lots in common and can mate to produce fertile offspring
