

Aerobic Respiration

Across

3. Energy from respiration allows muscles to do this
5. This type of respiration uses oxygen
8. Respiration rate does this when exercising
9. Oxygen absorbed here enters the bloodstream
10. Delivers the glucose and oxygen to body cells

Down

1. Inside the cell, where respiration occurs
2. These are responsible for respiration
4. Used to break down foods into glucose
6. This is produced/released by respiration
7. One of the products of aerobic respiration
