

Aeromicrobiology

Across

1. one environmental effect because of air pollution

4. Released by sneezing, talking

9. low number of microbes in air is due to

10. substance released into air which causes air pollution can be called as _____

11. microorganisms in air can be called as _____

12. AQI 101 to 200 indicates the quality of air as _____

13. its size is 4 to 10 microns
14. By cleaning of bedspread in hospital what is released into air?

15. ozone is found in which layer?

Down

2. Effect of air pollution on human beings

3. Example for secondary pollutant

5. One of the pollutant measured during air quality analysis

6. a primary pollutant

7. This affects the oxygen carrying capacity of blood

8. one of the natural source of releasing pollutant into air
