

Air Quality

Across

9. organic chemicals that vaporize and form toxic fumes

10. minerals that form long thin fibers - valued for strength and heat resistance

12. second leading cause of lung cancer in america

Down

1. traps pollutants near the surface

2. buildings with poor air quality

3. when primary pollutants react with other chemicals

4. put directly into the air by human activity

5. increases stress and anxiety and diminishes view of the night sky

6. headaches, tight chest, respiratory infection

7. when nitrogen oxides and volatile organic hydrocarbons react with heat/sun

8. emphysema, lung cancer, heart disease

11. moves gases through a spray of water that dissolves many pollutants
