

Algebra

Across

3. a solution of an equation
5. the 'y' values
8. one of four regions into which coordinates axes divides a plane
13. the study of mathematic equations
16. a part of a whole
18. to find the solution
19. an expression consisting of two terms
20. a polynomial with three terms
21. stays the same

Down

1. a law that is followed in mathematics
2. the 'x' values
4. a letter that represents one or more numbers
6. mathematical sentence that does not have an equal sign
7. mathematical statement that contains an equal sign
9. the part left over
10. parts of an expression
11. the answer to a multiplication problem

12. shows a mathematical relationship between expression

14. a pictorial representation
15. the number in front of the variable in a term
17. a measure of steepness of a line
