

Algebra 1 Review

Across

- 2. X-values of function.
- 4. What is point-slope form?
- 5. $3b+12 > 27-2b$?
- 10. what does the "C" in C.O.R.S mean?
- 12. $2x=4$?
- 15. When distributing, you always...?
- 16. The number that appears the most.
- 17. Shows the direction of the solution.

Word Bank

- Inequalities
- Equations
- $x=2$
- Multiply
- $b>3$

- Symmetric
- Quantitative
- Center
- Outliers
- Domain

- $y-y_1=m(x-x_1)$
- Boxplots
- No solution
- $y=6x-22$

- 18. What does the "O" in C.O.R.S mean?
 - 19. Y-values of function.
 - 20. What is one type of shape?
 - 21. Vertical lines have an...?
 - 22. $(3, -4)$ & $m=6$ (slope intercept form)
- Down**
- 1. What is Data?
 - 3. What is the slope-intercept formula?
 - 6. $|3x-6| -5 = -7$?

- 7. Summarizes and shows shape of data.
- 8. Shows the relationship between two changing quantities.
- 9. When a line goes horizontal in a graph, it is equal to...?
- 11. What is one type of data?
- 13. All parts of box evenly spaced.
- 14. Mathematical statement that says two expressions are equal.
