

Algebra I Probability & Statistics

Across

7. data variables of descriptive groups
 11. the difference between the lowest data value from the highest value
 13. data value that is far from the bulk of the data
 14. data distribution that is symmetric and mound shape
 16. the data value in the middle of a distribution
 18. graphical display used to compare frequency(counts) of different groups

19. data values divided into four equal parts
 20. median is also known as...
 21. how varied a set of data values are in a distribution from its center

Down

1. standardize way of showing a distribution using a 5-number summary
 2. known as the mean, median, and mode
 3. Data of descriptive values
 4. typical distance of each data value from its mean

5. the 25th percentile
 6. an organization of data using rows and columns
 8. the 75th percentile
 9. graphical display of data values using bars at different heights to represent ranges of values
 10. data of numerical values
 12. collection of information either qualitative or quantitative
 15. middle 50% of the data in a distribution
 17. Average
