# Algebraic Expression Key Terms

- |  |                |
|--|----------------|
| 1. The known number that is a factors of a variable.   | A. substitute  |
| 2. A term that is a known number without variables   | B. exponent    |
| 3. A number that shows how many times a base is used as a factor                                       | C. constant    |
| 4. To find the value of an expression  | D. difference  |
| 5. The result of subtraction.  | E. evaluate    |
| 6. A letter that stands for an unknown number  | F. quotient    |
| 7. A group of numbers, variables and/or operations symbols that represent a mathematical relationship. | G. Factor      |
| 8. A number, or expression with parentheses, that is multiplied.                                       | H. variable    |
| 9. The result of multiplication.   | I. factor      |
| 10. The result of addition.  | J. sum         |
| 11. The result of division.  | K. coefficient |
| 12. Means to replace one thing with another.   | L. expression  |
