# Anatomical Position

- |  |                     |
|--|---------------------|
| 1. structure is closer to the head or higher than another structure  | A. medial           |
| 2. structure closer to the feet or lower than another structure  | B. posterior        |
| 3. structure is more in front than another structure   | C. inferior         |
| 4. structure is more behind than another structure   | D. anterior         |
| 5. structure is close to the medial line   | E. sagittal plane   |
| 6. structure other away from the medial line than the other structure  | F. lateral          |
| 7. references the limbs and the structure is closer to the median plane or the root of the limb than the structure         | G. frontal plane    |
| 8. references the limbs and the structure is further away from the median plane or the root of the limb than the structure | H. proximal         |
| 9. plane that divides the body into unequal left and right parts and parallel to the medial line                           | I. distal           |
| 10. plane that divides the body into equal left and right sides  | J. transverse plane |
| 11. divides the body into front and back. (anterior and posterior)   | K. medial line      |
| 12. divides the body into upper and lower parts. (superior and inferior)   | L. superior         |
