

Anatomy

Across

- 4. Adaptive immune system
- 8. Drug compound to treat allergies
- 15. Small bar framework
- 16. Immunized by injection
- 18. Immature cell developed
- 19. Cancer lesions in soft tissue
- 20. Blot procedure to detect proteins

Down

- 1. Tissue in spleen compacted
- 2. Autoimmune disease system
- 3. Small tract lining
- 5. Vaccine contains antigens
- 6. Exposed cells
- 7. Secondary lymphoid Organ
- 9. Large blood vessels

- 10. Immunity passed on from birth
- 11. Infection and cancer fighting
- 12. Clumps of red blood cells
- 13. Action or process of substance from a solution
- 14. Loose plates of red blood cells
- 17. Small secretory cavity,gland
