

Anatomy CH 4

Across

- 2.** movement out
3. builds new structures
7. like warm, moist environments
9. ensure new cells are perfect
11. usable energy

- 12.** nucleus disappears, chromosomes come out, spindles form, & chromosomes attach to the spindle
13. movement of large particles in the cells
14. the movement out of cells
15. little organs

Down

- 1.** cell splits in 2

- 4.** converts sugar into energy (ATP)
5. when cells are functioning normally
6. generally carried by mosquitoes
8. chromosomes line up in the middle of the cell
10. makes proteins and repairs structures
