

Anatomy/ Positioning of the Cervical Spine

Across

3. The zygapophyseal joints in the Cervical Spine show a ____ lateral?
8. The intervertebral foramina is seen in a lateral or oblique position of the Cervical Spine?
10. What is demonstrated in the AP open mouth of the Cspine?
11. In an LAO and RAO oblique position, what is the CR angle and how much?
13. To see intervertebral foramina in an oblique Cervical Spine, the patient needs to be in an ____ oblique?
16. Where do you center for a Cervicothoracic?
17. What is the single most important radiograph clinically for a cervical spine series?
20. In an RPO of the Cervical Spine, what intervertebral foramina would be demonstrated?

Word Bank

40 inches
15 degrees cephalad
Cervicothoracic
low
C3 to T2
C4
45 degree

90 degree
C1 and C2
anterior and posterior obliques
3 to 5 degree caudad angle
Right
T1

Zygapophyseal joints
C1 through C7 and T1
15 degrees caudad
downside
72 inches
upside

Left
Right intervertebral foramina
Left
oblique position
lateral
15 to 20 degrees cephalad

21. What is the SID for the lateral Cspine?

22. Breathing techniques require a long exposure time and a ____ mA

23. In an RAO of the Cervical Spine, what intervertebral foramina would be demonstrated?

24. For the LPO and RPO oblique position, the ____ side is visualized?

25. What is the CR angle used for the AP axial Cspine?

Down

1. C2 through C7 is demonstrated in what positions of the Cspine?

2. In an LPO of the Cervical Spine, what foramina would be demonstrated?

4. In a LAO and RAO oblique position, the ____ side is visualized?

5. What is the SID for the AP open mouth projection?

6. What angle would be necessary to help separate the two shoulders farthest from the IR in a Cervicothoracic position?

7. What is seen in a lateral Cervical Spine?

9. For the LPO and RPO oblique position, what is the CR angle and how much?

12. Where do you center for an AP axial Cspine?

14. What position demonstrates C5 to T3?

15. What does the lateral Cspine demonstrate?

18. What is demonstrated in an AP axial Cspine?

19. In an LAO of the Cervical Spine, what intervertebral foramina would be demonstrated?
