

Angle Vocabulary

Across

2. the rays of the angle are called
5. Angles that have the same measure are
7. Two angles that are opposite of each other at an intersection are
10. An angle whose measure is between 90 and 180 degrees
11. An angle whose measure is 180 degrees

13. A ray that divides an angle into two congruent angles

14. A pair of adjacent angles that form a straight angle

15. Two angles whose measure have a sum of 180 degrees

Down

1. An angle whose measure is between 0 and 90 degrees
3. Two angles that share a side and endpoint are

4. Two angles whose measure has a sum of 90 degrees

6. An angle whose measure is 90 degrees

8. The difference between the real numbers paired with the rays of the angle

9. The common endpoint is called

12. Formed by two rays with the same endpoint
