

# Angles

## Across

3. right angles are formed by these lines  
 4. Less than 90 degrees  
 9. the point where two rays originate to form an angle  
 10. these form the sides of an angle  
 11. Two angles that are the same measurement

13. one angle whose measure is 180 degrees  
 14. Cuts an angle in half
- ## Down
1. Congruent angles formed by intersecting lines  
 2. Two angles whose opposite rays form a line (180 degrees)

5. Two angles that whose sum is 90 degrees  
 6. Two angles whose sum is 180 degrees  
 7. More than 90 degrees but less than 180 degrees  
 8. Share a common side and vertex but no interior points  
 12. 90 degrees
