

Name: _____

Date: _____

Animal Cell

Across

2. What is a jelly-like substance, where chemical reactions happen?
3. What generates most of the chemical energy needed to power the cell's biochemical reactions?
7. What carries genetic information and controls what happens inside the cell?
8. What functions as the digestive system of the cell?
9. What helps process and package proteins and lipid molecules?

10. What makes proteins?

11. What produces proteins for the rest of the cell to function?

Down

1. What stores lipids?
4. What produces and assembles the cell's ribosomes?
5. What protects and organizes the cell?
6. What helps break down waste products?
