# Animal Cell

## Across

2. allows items in and out of the cell

6. single or multi-celled organism, complex

9. network of tubular membranes, involved in transport of materials

10. organelle containing degradative enzymes

11. small dense spherical structure within the nucleus

13. occurs in pairs, involved in development of spindle fibers

14. microscopic network of protein filaments & tubules in the cytoplasm

15. fluid that fills the cell, material or protoplasm

## Down

1. Organelle that helps the cell turn food into ATP energy

3. simple, single celled organism

4. material of which the chromosomes of organisms are composed

5. particle consisting RNA, large numbers in the cytoplasm

7. organelle that directs cell activities

8. consisting of clusters of flattened vesicles

12. smallest unit of living things
