# Animals and Sound

## Across

- 4. the sound of this animal is made by the vibration of its wings
- 6. this animal squeals or oinks for the same reasons that babies cry....fear being the most common
- 9. noise produced by dogs, wolves, coyotes, and foxes
- 10. animal that makes a high pitch moo when it can't find its calf

- 11. this animal is sometimes called a "gobbler" because of its famous sound
- 12. animal that has vocal cords shaped like a square instead of a triangle (like most animals) so they can get their roar extra loud

## Down

- 1. this animal makes sound by chiseling and pecking wood
- 2. this amphibian a special bubble-looking body part that helps them make their croaking sound

- 3. these animals can produce very low frequency sounds because of their long trunk
- 5. this animal makes sounds that are two or three times higher than humans can hear
- 7. animal that makes 16 different sounds including purr, meow, hiss, growl
- 8. this animal you can hear hooting from just before sunset to just before sunrise
