

Astronomy Vocab

Across

2. Widely accepted scientific theory about the origin of the universe
7. When the moon's light is increasing: the moon appears to be getting larger
8. The actual data received from a spectroscope
9. When the moon comes between the Earth and sun and casts a shadow on Earth
10. When the Earth comes between the sun and the moon and casts a shadow on the moon

Down

1. When the moon light is decreasing: the moon appears to be getting smaller
3. Least difference in tides: high tides are lowest and low tides are highest
4. Tool used to study visible light
5. The mass of water pulled from the Earth's surface by the gravity of the moon
6. Largest difference in tides: high tides are highest and low tides are the lowest
