

# Atmosphere/Weather Review

**Across**

- 2. What is the measure of moisture in the air?
- 3. What is the transfer of heat from the sun through space to the Earth?
- 6. What is the daily variation of temperature, clouds, humidity, and precipitation?
- 10. What is the transfer of heat in moving fluid, liquid, or gas?
- 12. What is a rotating storm that forms in a thunderstorm because of rising warm air?

- 13. What instrument measures atmospheric pressure?

- 14. What is precipitation that evaporates before hitting the ground?
- 15. What do you call a person who studies weather?

**Down**

- 1. What is a large rotating storm that forms over warm water in the ocean?
- 4. What is the transfer of heat through direct contact?

- 5. What is the measure of how much energy is in a substance's molecules?
- 7. What is a collection of water droplets in the sky?
- 8. What forms because of the friction between water particles in clouds?
- 9. What instrument measures wind speed?
- 11. What is the transfer of energy between substances?
