# Atoms

## Across

1. which element has 5 neutrons
5. What is the charge of a proton
6. what element has 28 protons
7. how many electrons does helium have
10. what element has 16 neutrons
11. what element has a atomic number of 10 protons
15. what element has 26 protons

16. how many electrons does oxygen have
  17. which element has 18 proton
  18. Does APE MAN work for every atom
  19. what element has 7 neutrons
  20. what element has 20 neutrons
- Down**
2. the smallest subatomic particle of an element with a negative charge

3. which element has 6 protons
4. the mass of an atom is mainly from
8. what element has six neutrons
9. how many protons does sodium have
12. what element has 19 protons
13. What element has 1 proton
14. what element has 29 electrons
