

Atoms and Forms of energy

Across

5. Where are the protons and neutrons located
7. What charge does protons have
8. A boulder sitting in top of a hill is an example of Energy
9. What best describes a electron
10. What does the first letter for Mrs.chen stand for
11. What is the energy transformation for a bike

Down

1. What energy transformation happens during photosynthesis
2. Where is an electron located
3. What is the energy transformation for a lamp
4. A moving ball is an example ofenergy
6. What charge does a neutron have
