

Awesome atomic structure

Across

2. Which element has two electrons?
5. What contains the protons and neutrons?
8. What does the atomic number represent?
9. How many electrons are in oxygen?
10. What charge is an electron?

Down

1. Where do you find the electrons?
3. What overall charge does an atom have?
4. What are the tiny particles everything is made up of?
6. How many types of atoms are there in an element?
7. What charge does a proton have?
