

# BA Chapter 3

## Across

3. \_\_\_\_\_ testing, which requires the execution of the software being tested.
4. \_\_\_\_\_ testing relies on the manual examination of work products.
8. A \_\_\_\_\_-based review is a technique in which the reviewers evaluate the work product from the perspective of individual stakeholder roles.
9. Creates the work product under review.
10. Is often the person upon whom the success of the review depends

## Down

1. detecting potential defects, evaluating quality and building confidence in the work product, preventing future similar defects through author learning and root cause analysis
2. In a \_\_\_\_\_-based review, reviewers are provided with structured guidelines on how to read through the work product.
5. find defects, improve the software product, consider alternative implementations, evaluate conformance to standards and specifications
6. \_\_\_\_\_ reviews are characterized by not following a defined process and not having formal documented output.
7. gaining consensus, detecting potential defects
