# BIOLOGY 30

## Across

- 6. A cosmologist who researches an alien type of life.
- 7. Hadaen Geologist, found rock in Greenland
- 9. Smallest structure.
- 10. Study of living things
- 11. Use chemicals such as iron and sulfur as their energy.
- 14. Total of all chemical reaction in an organism.
- 16. Same structure different function.

17. Study of classification of organism.

19. Study of evolutionary relationship

20. Chemist who seeks to discover the origin of DNA.

## Down

- 1. Producers that can make their in food.
- 2. Two different parent organism contributed.
- 3. Process of breaking down.

4. Main function is to protect and support plant cell.

5. Eat plants and animals.

8. They do not have nucleus

12. Thought to have developed.

13. Use sunlight to make food.

15. Process of building up complex substances from simpler substances

18. Composed of DNA
