

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# BIOLOGY IS SO AWESOME!

### Across

- 2. Enhancing the process of cleaning up pollutant by the use of microorganisms
- 3. non flowering plants
- 4. I this scientific name typed correctly?--> Homo Sapiens
- 8. also known as a "fake foot"
- 12. clubmosses, horsetails, ferns, gymnosperms, and angiosperms are all \_\_\_\_\_
- 15. asexual reproduction of prokaryotes that involves creating a genetically identical copy

16. flowering plant

17. protists photosynthesis takes place in \_\_\_\_\_

### Down

- 1. prokaryotes have \_\_\_\_\_ that house all the genetic information when the organism is under inhospitable conditions
- 5. the most inclusive taxonomic rank
- 6. this form of prokaryotic reproduction allows DNA to transfer between a donor and a recipient with the use of a sex pili
- 7. plants that are most commonly found in moist environments

9. Domain of life that consists of kingdom protista, fungi, plantae and animalia

10. Domain of life that consists of organisms with thicker, rotating flagella

11. photosynthetic protists are collectively known as \_\_\_\_\_

14. film of bacteria that sticks to a surface and is very hard to remove
