

Name: _____

Date: _____

BIOMOLECULES

Across

- 3. Guanine is always paired to_____ .
- 4. DNA and RNA are made of...
- 6. fish, meat, beans, nuts
- 11. composed of a large number of monosaccharides
- 13. carries genetic information from DNA to ribosome
- 14. An organic compound that provide more than twice as much energy as carbohydrates.

- 15. Fats that are liquid at room temperature
- 16. polysaccharide that is stored in plants
- 17. Simplest form of carbohydrates
- 18. carries information that directs all cellular activities

Down

- 1. provides the body with energy
- 2. monomers of proteins

- 5. Polymers that are manufactured in factories
- 7. A polymer that contains c,h,o,n,p
- 8. Table sugar
- 9. Polymers produced by living things.
- 10. a good source of fiber
- 12. also called as fiber
