

BODY FLUIDS

Across

1. What type of solution is blood products?
4. Solution that cause fluid to be pulled from the interstitial compartments into the blood vessels
7. Substance dissolved in solution
11. Insensible fluid loss
12. Utilizes a pump that moves fluid from an area of low to high concentration. (2 words)

13. One of the simplest mechanism for maintaining fluid balance

14. When daily gains and losses of fluid are equal (2 words)

Down

2. Decreased circulating volume
3. Passive movement of fluid from areas of high concentration to low concentration

5. Abnormal accumulation of fluid in interstitial spaces of tissues.

6. Loss of body fluids that cause serum sodium levels to rise

8. Sensible Fluid Loss

9. What type of solution is used to treat dehydration? (2 words)

10. Solution that causes fluid to move from the extracellular space into the cells
