

BRAIN

Across

1. a region in the frontal lobe of the dominant hemisphere linked to speech production
4. What is the outer layer of neural tissue of the cerebrum of the brain
6. Humans and other mammals have two one in each side of the brain
9. positioned above the temporal lobe and behind the frontal lobe and central sulcus
10. controls important cognitive skills in humans

12. responsible for control of the left side of the body

13. one of two almond-shaped clusters of nuclei located deep and medially within the temporal lobes of the brain's cerebrum in complex vertebrates, including humans

Down

2. The two hemispheres in your brain are connected by a thick bundle of nerve fibres called the

3. Responsible for control of the right side of the body

5. posterior stalk-like part of the brain that connects the cerebrum with the spinal cord

7. participates in vision processing

8. a major feature of the hindbrain of all vertebrates

11. located beneath the lateral fissure on both cerebral hemispheres of the mammalian brain
