

# Bacteria and enzymes, digestion

**Across**

- 7. The process where food is broken down
- 8. Enzymes which break down carbohydrates
- 9. Enzymes which break down proteins
- 11. substance made by bacteria in the gut

**Down**

- 1. Biological catalyst that speeds up digestion
- 2. Chemicals that speed up reactions
- 3. Microscopic organisms in the large intestine
- 4. enzymes which break down lipids
- 5. What bacteria feed on to produce useful vitamins like vitamin K
- 6. Chemical that breaks down lipids
- 10. How fast a reaction is
