

# Big Bang Theory

## Across

3. other than hydrogen and helium, first present element in the universe

5. range of frequencies of electromagnetic radiation

6. leftover radiation from the big bang

7. 73% of visible particles universe

8. all matter

9. 25% of visible particles universe

10. decrease in wavelength

## Down

1. increase in wavelength

2. these combined, expanded, and cooled to form objects in the universe

4. theory of the origin of the universe
