

Big Spring Nature Hike

Across

- 2. White and puffy, they float high overhead.
- 3. They grow big and tall, with branches and leaves.
- 4. They are hard and tough, fitting in your hand.
- 10. They fly high in the sky with wings of feathers.
- 12. The places where animals and plants live.
- 14. Sometimes called a shrub.
- 16. It is where water collects, and animals come to drink.

18. They attract pollinator insects, and often smell good too!

19. With pretty wings, they fly from flower to flower.

20. When this gets wet, it turns into mud.

Down

1. The study of the physical and natural world using observation & experiments.

5. Put this in the garbage to keep it out of our forest and waters.

6. The places where you see nature, not inside.

7. It grows from the ground, and sometimes needs mowing.

8. Stay on this so you don't get lost.

9. It can blow hard and mess up your hair!

11. This is how we re-use items instead of throwing them away.

13. We all drink it to live, so we must keep it clean!

15. Animals that roam free.

17. Everything in the world not made by people.
