

Biochemistry

Across

- 3. monomers of proteins
- 5. two monosaccharides linked together
- 6. function of lipids
- 8. monomer that makes up most of the cell membrane
- 10. nerve cells have a _____ sheath
- 12. number of naturally occurring amino acids
- 16. energy storage in animals

18. lipids maintain body temperature for _____

- 19. another name for proteins
- 20. carbohydrates in plant structure

Down

- 1. many monosaccharides linked together
- 2. made mostly of elements carbon & hydrogen, with a few oxygens
- 4. also known as sugars

7. made of monomers

- 9. _____ and steroids are both lipids
- 11. energy storage in plants
- 13. lipids serve as a _____-term source of energy
- 14. carbohydrates serve as a _____ source of energy
- 15. example of monosaccharides
- 17. bonds that connect amino acids
