

# Biology

## Across

5. Animals with jaws
7. An internal, usually fluid-filled body cavity that is completely or partially lined with mesoderm
8. Similarity among organisms of different species due to reasons other than common ancestry, such as convergent evolution
9. Stiff spike of silica or calcium carbonate that provides structural support in the body of many sponges
10. The physical structure of organisms

## Down

1. An evolutionary unit that includes an ancestral population and all of its descendants but no others
2. Direct transfer of heat between two objects that are in physical contact
3. An unnatural group based on convergent characteristics that are not present in a common ancestor
4. Similarity among organisms of different species due to shared ancestry
6. The cell formed by the union of two gametes; a fertilized egg
