

Biology Unit 5 Vocab

Across

- 2. Caused by cells constantly creating more
- 3. Two copies of each chromosome
- 7. Process of converting Sunlight into glucose
- 8. High to low concentration
- 11. Moves from low to high conclusion
- 18. Useable energy
- 20. Chromosomes line up in middle
- 21. Break down molecules
- 22. Sex cells
- 23. Amount of something
- 24. Same solute
- 25. Found in plant cell, maintains structure

- 29. Converting glucose into atp

- 31. The balance
- 33. DNA replication
- 35. Sugar
- 36. High to low concentration
- 37. Cells divide
- 38. Having same concentration
- 39. Low solute
- 40. Reactions in body

Down

- 1. Chromosomes preparing to divide
- 4. Jelly like substance
- 5. High solute
- 6. Longest phase
- 9. The two cells have split

- 10. Chromosomes separate

- 12. Assemble proteins
- 13. Sort proteins
- 14. Somatic cells
- 15. Identical diploid cells
- 16. Movement of water
- 17. Convert sunlight into glucose
- 19. Specialized structure
- 26. The guard of cell
- 27. One copy of chromosome
- 28. Convert chemical energy into usable energy
- 30. Brain of cell
- 32. Cell division
- 34. Creating unique sex cells
