

# Biology Vocab Ch. 2

**Across**

**2.** smallest unit unit of most compounds

**8.** a process that changes on set of chemicals to another

**9.** WATER

**11.** made mostly from carbon and hydrogen atoms

**13.** the elements produced by a chemical reaction

**14.** table salt

**15.** the elements that enter into a chemical reaction

**Down**

**1.** attraction between molecule of the same substances

**3.** attraction between molecule of different substances

**4.** compounds made up of carbon,hydrogen,and oxygen atoms

**5.** macromolecule containing hydrogen,oxygen,nitrogen, and carbon

**6.** a material composed of 2 or more elements

**7.** such mixtures of water and nondissolved material

**10.** a compound that produces hydroxide

**12.** Weak Acids
