

Name: _____

Date: _____

Biology

Across

- 1. double membrane that surrounds the nucleus
- 3. holes in the nuclear membrane where ribosomes pass
- 11. where photosynthesis takes place
- 13. stands of DNA
- 15. space in the cell that is used to store water, nutrients and waste
- 16. rigid structure in plant cells that is used for support

17. controls the activities of the cell

18. whip like used in locomotion

Down

- 2. has digestive enzymes that digest old organelles
- 4. surrounds the cell and selectively permeable
- 5. makes energy in the form of ATP
- 6. packaging and distribution of proteins

7. transports things around in the cell

8. membranes that have ribosomes and help to make protein

9. in the nucleus and it makes ribosomes

10. membranes that help to make lipids

12. makes protein

14. Short hair like used in locomotion
