

Biology project

Across

2. 4 bases make up DNA
 3. Place where genes are found
 7. Weaker trait
 8. The genetic characteristics
 10. Chance that an event will occur
 13. Deoxyribonucleic Acid

14. Cell with half original chromosomes
 15. An organism that has two different alleles for a trait

Down

1. The physical characteristics
 4. An organism with 2 identical alleles for a trait

5. Permanent change in a gene

6. takes place in sex cells/four cells produced

9. Stronger trait

11. Alternate form of a gene for a trait

12. A characteristic that an organism can pass on to its offspring through its genes

Word Bank

GENOTYPE	ALLEL	HETEROZYGOUS	DNA
TRAIT	CHROMOSOME	HOMOZYGOUS	PROBABILITY
NITROGENBASES	MUTATION	PHENOTYPE	DOMINATE
RECESSIVE	HAPLOID	MEIOSIS
