

Name: \_\_\_\_\_

# Biology test

## Across

2. A large molecule built up from many similar molecules
4. A chemical reaction where the covalent bond between two molecules is broken with water
6. what do the polar covalent bonds make?
8. What carbohydrate has many glycosidic bonds?
10. What do plants store carbohydrate as?

## 11. What is the test for starch?

## Down

1. What is the glucose molecule with the OH below?
3. What is the name for a single small molecule?
5. What is the glucose molecule with the OH above?
7. Forces between water molecules and sides of narrow vessels
9. What is released during cell respiration?
