

Biomolecule/Enzyme/DNA Crossword

Across

- 2. These scientists discovered the 3-D structure of DNA (Last Names only)
- 5. A set of three nucleotides is called a
- 7. These make proteins
- 10. Scientist who used x-ray diffraction (Last Name)

- 11. DNA wraps around _____ to form chromosomes
- 12. Special carbohydrate found in the plant cell wall
- 13. This is an unfolding of the enzyme
- 14. The most complex biomolecule

Down

- 1. The simplest biomolecule

- 3. Gaunine always pairs with _____
- 4. A codon codes for a specific _____
- 6. Adenine always pairs with _____
- 8. What are the units of genetic material
- 9. Different arrangement of _____ in a nucleic acid is the key to diversity
