

Name: \_\_\_\_\_

# Biosphere

## Across

- 2. Type of nutrition in which living things produce their own organic matter
- 3. Chemical reactions in living things
- 5. A cell with no nucleus

8. It produces energy through cellular respiration

10. It contains the genetic material in eukaryotic cells

11. It controls what moves in and out of the cell

12. It carries out photosynthesis

## Down

- 1. A cell with nucleus
- 4. It stores water
- 6. It produces proteins
- 7. Receive stimuli and react
- 9. Biomolecules that may appear outside living things
